Forecast for Wednesday 30 Jun 2021

Weather: Dry with some clear spells during the early hours, but with some isolated fog patches and associated patchy low cloud developing in valleys for a time around dawn. The morning will be dry with some sunny spells, but scattered mainly light showers are likely to develop during the afternoon, these fading later to leave a dry evening with partly cloudy skies.

Chance of cloud free mountain/hill tops above 600m: 70% around dawn otherwise close to 100% throughout the day with little or no cloud beneath summit level.

Visibility: Locally poor in any valley fog around dawn, and with some shallow banks of low cloud briefly bringing poor visibilities on slopes above 300m as the fog lifts and clears. Otherwise generally very good visibility at low levels with some patchy cloud briefly around 800-900m mid-morning, this lifting well clear of the summits by midday, and with only brief temporary deteriorations in any afternoon showers.

Meteorologist's View

UV levels will be high or very high, so with strong sunshine during any sunny spells sun protection is advised.

Recent rainfall: measured at Neuadd: altitude 353m

14:00 on Tue 29 Jun 2021	0mm	5.2mm	5.2mm

Forecast for Thursday 01 Jul 2021

Weather: Some shallow mist and fog patches may form in valleys around dawn, these lifting briefly into patchy low cloud before soon clearing to leave a fine morning with some spells of strong sunshine. Patchy cloud will bubble up late morning onwards, this perhaps giving an isolated afternoon shower. The evening will be dry with clear spells

Maximum wind: Mainly northwesterly 10mph.

Chance of cloud free mountain/hill tops above 600m: 60% at first, otherwise close to 100% through much of the day with little or no cloud below the summits.

Visibility: Locally poor in any valley fog around dawn, and with some banks of low cloud briefly bringing poor visibilities on slopes above 300m as the fog lifts and clears. Otherwise generally very good with excellent clarity, with cloud holding clear of the summits and with any showers only bringing brief temporary deteriorations

Temperature: **Valleys:** Plus 11 Celsius becoming Plus 22 Celsius.
At 600m: Plus 14 Celsius.
Freezing level: Well above the summits.
